

YVONNE THOMPSON, MA (Leadership) CPHR
Topic

***Who's Responsibility for SAFETY Anyway?
 Creating A Culture of Accountability***

We say, "**Safety is Everyone's Responsibility**" but do our actions send that message? There is often a difference between our *intention* and the actual results we get. Is it possible that we are unintentionally sending the wrong message?

Yvonne's high-energy presentations captivate audiences each and every time. Yvonne challenges our fundamental beliefs about safety performance and accountability. She loves to ask and explore the tough questions like: *Who Manages YOU Best?* The answer is always the same, "*I do of course*". So why do we think our employees are any different than we are. They simply want an opportunity to lead themselves. Yvonne uses accepted research in Neuroscience and NeuroLeadership to challenge our fundamental beliefs about people performance, safety and personal accountability. Yvonne takes her audience on a journey of exploration into how to shift from victim to empowerment and where corporate safety culture can evolve into increased honesty and enhanced personal accountability for safety results. Yvonne shares a roadmap and her unique **Accountability Model**. She is generous with all of her materials and truly believes in sharing all that she knows in order to assist corporations in moving towards a Culture of Personal Accountability.

Topics interactively explored:

- ⊕ *Who's Responsible for Safety?*
- ⊕ *The Neuroscience of Coherence*
- ⊕ *Our Levels of Awareness*
- ⊕ *Shifting from the Victim Mentality to true Accountability*
- ⊕ *Accessing the Heart and Intuition for improved Safety results*
- ⊕ *Tools of Intentional Personal Leadership*
